AccessiFlow Platform v1.2.0

Official Digital Inclusion Audit Documentation

April 1, 2026 | Prasan Kumar

1. Executive Summary

AccessiFlow v1.2.0 marks a pivotal leap in multi-engine accessibility simulation. This release standardizes the **Cinematic Lite Purple** interaction model, introduces high-fidelity **6-Phase Web Auditing**, and provides enterprise-grade **Master Audit Excel Reports**. The platform is currently live on Google Cloud Run, serving as a unified validation hub for WCAG 2.1 AA compliance.

2. Visual Core & Rebranding

The "Cinematic Lite Purple" update brings a premium, dark-themed experience to all users.

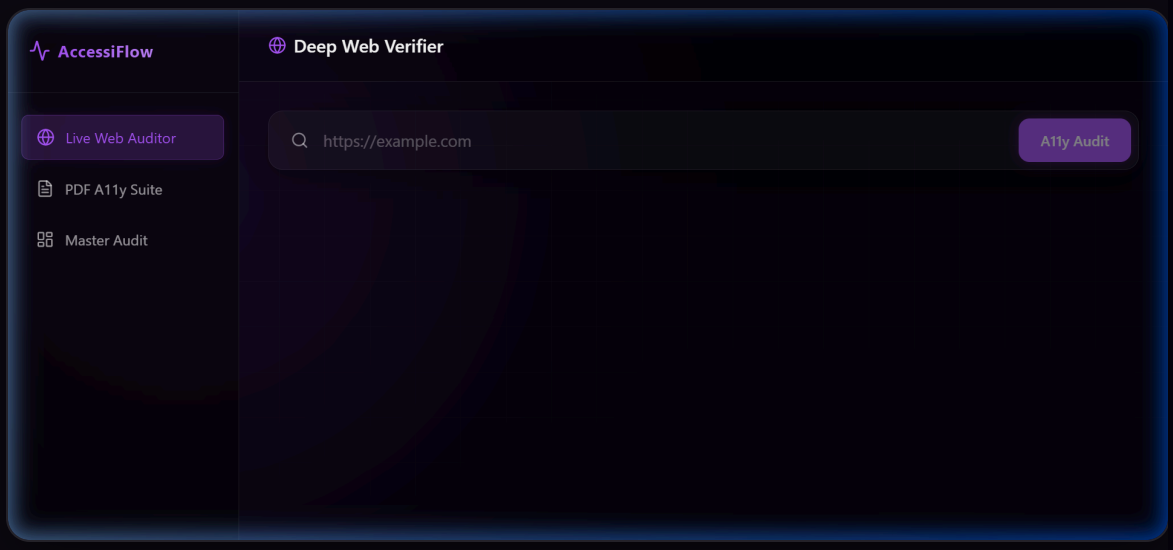
Glassmorphism UI

Interactive panels with native backdrop-blur filters for a 3D overlay feel.

A11y Audit Branding

Standardized primary Call-to-Action buttons for clarity and accessibility.

The v1.2.0 Dashboard



3. 6-Phase Audit Engine

Our new simulation engine sequences through six distinct validation modules to ensure zero-gap detection:

1. **IBM Equal Access**: Global DOM traversal and landmark check.
2. **NVDA Simulation**: Virtual screen reader announcement verification.
3. **Keyboard Integrity**: Exhaustive tab-order and focus-trap logic.
4. **Luminance Auditor**: Native contrast ratio (1.4.3) pixel validation.
5. **Guideline Mapping**: Automated WCAG rule-by-rule correlation.
6. **VPAT Readiness**: Pre-filled Voluntary Product Accessibility Templates.

Audit Success Verification (Google.com)

4. Cloud Infrastructure

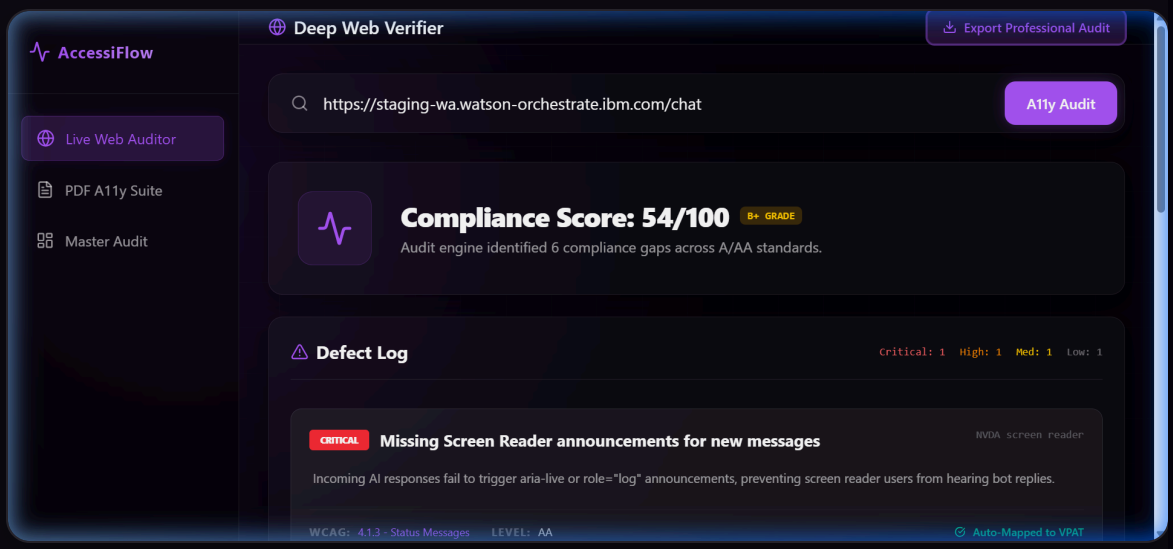
AccessiFlow is fully containerized and hosted in a high-availability environment.

- **Runtime**: Google Cloud Run (us-central1)
- **Deployment**: Automatic Cloud Build integration
- **Live Site**: `https://accessiflow-551407117123.us-central1.run.app`

5. Defect Log Logic

The 2-sheet Master Audit provides deep technical insights including Component identification, WCAG mapping, Fix recommendations, and User Impact statements.

Watson Orchestrate Deep Audit (Special Case)



Approved for Production Deployment

Final Release: April 2026
